

Mentor is an exciting furniture series from Library Bureau that blends the proportion, balance, and symmetry of contemporary yet timeless design, with the quality and durability of the finest materials and workmanship.

Mentor is available in three different versions, each characterized by distinctive top, edge and reveal design elements. Choose from red oak or maple, with a broad spectrum of wood finishes and textured paints. A wide variety of laminate and veneer work-surface options are also available. Together these features represent infinite possibilities for attaining a truly unique look.

Library Bureau offers Mentor in a full range of sizes and shapes to meet function and space requirements. State-of-the-art wire management, power, data, and communication and lighting accessories may be added to meet your requirements.

Mentor continues Library Bureau's tradition of quality and durability, the product of more than 100 years of experience in the craft of fine furniture construction.

Tables are available in a full spectrum of shapes and sizes to meet space and function requirements. Wire management, power, data, communication and lighting accessories may be incorporated into all tables. Select from various work surface sizes and leg heights to accommodate the needs of your patrons. Combine colors and textures to create furnishings that complement the total design theme of the library/media center. Select wood finishes or textured-paint legs with wood veneer or plastic laminate tops.

The radiused profile of the external wood edge band of Mentor Version 1 is complemented by the radiused reveal. Select either the same wood finish as the edge band or paint the reveal to match or complement the painted leg plate and textured paint leg. Painted leg plate and leg are offered in six standard colors.

Mentor Version 1 edge profiles are available on the full range of library furniture pieces offered by Library Bureau including charging desk units, computer carts, and technical furniture.

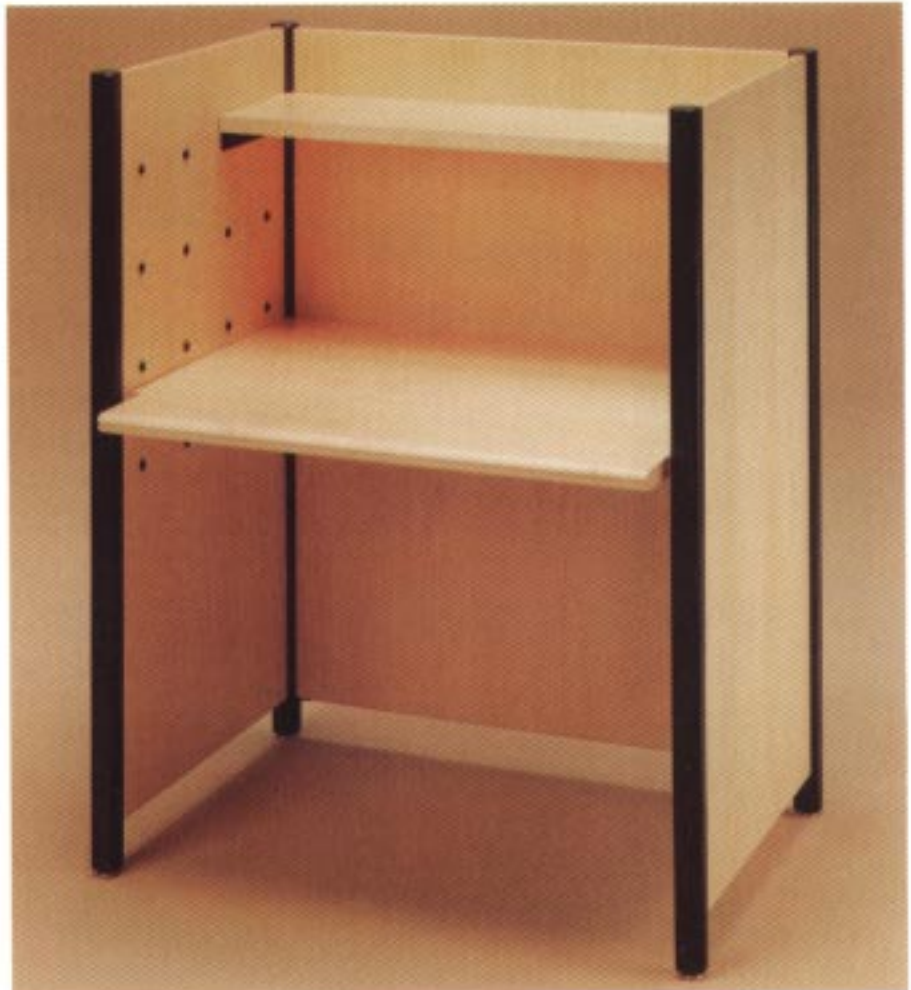

MENTOR VERSION I

Library Bureau offers modular carrels, based on post and panel construction, that afford maximum flexibility.

This system features:

- work surfaces that can be adjusted to four different heights, accommodating adult or youth seating, wheelchair access and adult standing requirements
- five standard widths and two standard depths
- a choice of single or double faced configuration
- modularity that allows for expansion and reconfiguration
- optional shelf that may be located above or below work surface
- two distinctive work surface edge treatments
- work surfaces that can extend out 1 1/2" creating an opening for continuous cord drop
- the ability to incorporate state-of-the-art wire management, power, data, communication and lighting accessories, ideal for computer needs

Library Bureau carrels can be specified in all the same colors and materials as our other fine furniture.

Grid pattern indicates work surface height and depth adjustments.

Mentor Version I work surface features a bull-nose edge treatment with reveal.
