A ModuForm Company

## Introducing the new Visions line from Library Bureau.

When we at Library Bureau set out to create a bold new line of library furniture, we consulted the specialists: librarians and library designers. We invited experts from around the country to critique our designs and to propose enhancements to meet the demands of their libraries.

The result is a furniture line that is as elegant and contemporary in function as it is in form. From its striking contours to its ingenious wire management system, Visions from Library Bureau is a line you'll remember.

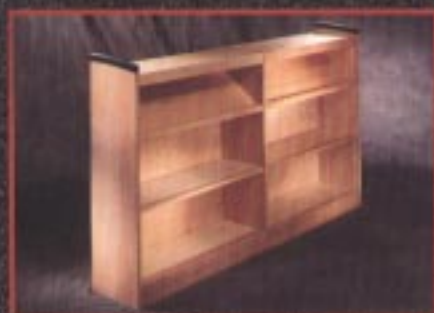

#### **WORKSTATIONS DESIGNED FOR PRODUCTIVITY**

Visions workstations have sides that are high enough for privacy, but low enough to let librarians observe patrons. Work heights are adjustable, and each workstation is available in a variety of widths. Units are completely modular and can be grouped in many configurations.

#### **COMPUTER WORKSTATIONS WITH DISTINCTION**

Workstations can be enhanced with the addition of attached shelving units for printers or storage. Combined with state-of-the-art wire management systems, these units are a truly unique solution for public access needs.

#### **BOOKSHELVES ADD FUNCTION AND FLAIR**

Visions bookshelves are available in several standard heights and widths and can be custom-ordered for unusual spaces. Like all Visions furniture, this shelving is UV Resin-coated for a luxurious finish and long life. Optional accessories for magazines, videos and CDs are available.

#### **WORK TABLES WITH HIGH-TECH STYLE**

Visions work tables are sturdy and attractive, and are available in a variety of laminate tops and edge treatments. Power and data access units are available as an added feature.
