Our furniture is constructed of northern grown hardwoods, solid oak or maple. Wood is inspected to be free of all detrimental defects, and is selected for its uniform grain and color. Exceptional care is taken in preparing the wood for balanced moisture content to assure quality and consistency in the finishing process. Prior to finishing, all furniture is thoroughly hand and/or machine smoothed and finished. Stain is applied followed by an environmentally-friendly ultraviolet cured coating, which is electro-statically bonded to the wood. This UV coating provides a finish that is deep, rich and luxurious as well as 33% more durable than conventional varnishes. It is chemically stable and resistant to heat and sunlight, and is equal to or exceeds finish testing procedures for sheen, wear resistance, and household chemical resistance.

Refer to the Price List catalog for availability. Due to the inherent nature of wood, some variation in color may occur. It is recommended that you request an actual wood sample before placing an order. Call customer service at 800-221-6638.
